## Evening Brief

Date: Tuesday August 22, 2017

---

### Weather Summary

**High Risk for Lightning Central and Eastern Idaho and NE Nevada Wednesday**

**High Risk for Strong Winds/Drier Air Idaho Thursday**

Generally dry conditions with warming temperatures will continue across the north through mid-week. Moisture in place across the Great Basin will generate afternoon thunderstorms again today, nearly region wide and spreading northward into Idaho as an approaching low pressure system out of the Pacific NW draws moisture north. **High Risk for Lightning** has been issued for most of Idaho and NE Nevada for Wednesday due to a mix of wet/dry storms where fuels are very dry.

An additional concern will be gusty winds moving into northern areas after the lightning. Even though temperatures will be cooler behind the cold front Thursday/ Friday, humidity will be lower and westerly winds of 15-30 mph are possible. **High Risk for Strong Winds/Drier Air** has been issued for much of Idaho Thursday.

---

### Preparedness Levels

Great Basin	3
National	5

---

### Great Basin Fire Activity (from Irwin): Moderate Activity

**New Fires and Acres: 33 fires for 978.1 acres; 1,620 acres large fire growth; 1 new large fire**

---

### Resources:

- Crews: 8 T1 IHCs in GB: 6 Committed, 1 Available, 1 Day Off.
  - GBCC has committed an estimated 23+ Type 3, 4, 6 engines.
  - 3-T1 and 6-T2 helicopters are available in GACC.
- 

### Great Basin Fire Potential Summary

Fuels across much of the area slowly dried and recovered recently from the monsoonal moisture earlier in the summer, with fire danger values at or below normal for the time of year, with the exception for parts of Idaho. **The mountains of Central Idaho have drier than normal fuels and will be the most likely area for new large fires later this week with both the lightning and winds.** A brief increase in moisture will help to keep fire potential moderated across the south and east through the period, with only a brief reprieve over the rest of the Great Basin due to moisture this week.

Prolonged drier and much warmer weather will return to the Great Basin later this week through early next week rapidly drying fuels again.

We continue to have a Great Basin Fuels and Fire Behavior Advisory in effect for Nevada, Idaho and Utah, available at the following link:
